Subject: FW: Critical Care

To Whom It May Concern,

I am just starting my "journey" with breast cancer. I am a 61 year old female diagnosed with Stage III Breast Cancer. Needless to say, in the near future I will not be able to work full time (if at all) while going through surgeries, radiation and possible chemotherapy.

This leads me to write this testimonial. Lisa Rudolph, CEO of Physicians Insurance Specialists, approached me to purchase a Critical Care policy approximately short eight short months ago. My first reaction was, ok, I will do that, then changed my mind, as I didn't think I could afford the monthly premium at the time, as my husband had just gone on social security disability. Needless to say, at this time, I certainly cannot afford NOT to have that coverage that I declined.

You never think something like this will happen to you.... BUT it does. That monthly income from a Critical Care policy would certainly have relieved some of the financial stress we will be facing in the near future.

If this testimonial persuades just one person to initiate a Critical Care policy, then this will make my writing this worth it!!!

Thank you and God bless.
